About FiberTect

FiberTect is a three-layer, inert, flexible, drapable, nonwoven composite substrate for absorbing and adsorbing chemical warfare agents (CWAs), toxic industrial chemicals (TICs), and pesticides).

About the RSDL (Reactive Skin Decontamination Lotion) Kit

This kit removes or neutralizes all known CWAs including GA (Tabun), GB (Sarin), GD (Soman), GF (Cyclohexyl Sarin), VX (nerve agent), HD (mustard), and T-2 (toxin).
