MPD KIT

FES-EPDS-DCON-KIT

MODULAR PERSONNEL DECONTAMINATION KIT

The Modular Personnel Decontamination kit (MPDK) is a self-contained, tactical solution that offers both wet decontamination (for biological and radiological agents) and dry decontamination (for chemical agents) processes. This field personnel decontamination system is independent, scalable, and designed for tactical operation. Highly portable, the MPDK system enables the swift removal of personal protective equipment and efficient decontaminiation for anywhere from 2 to 24 personnel engaged in Chemical, Biological, Radiological, or Nuclear (CBRN) events.

Features:

- **Easily scalable & fully customizable with kits for 2, 8, 16, and 24 personnel**
- **Well-organized for user convenience, featuring custom-cut labeled foam for consumable refills**
- **Built rugged and weather-resistant, ready for off-road usage**
- **Operates using standard portable batteries**
- **Dry and wet decontamination**

Contents:

- (3) S-Cut QE Knife
- (3) Trauma Shears
- (3) Tool Belts
- (3) Compact Head Lamps
