RAPID THREAT ASSESSMENT PACK

SENTINEL PACK

SCREEN • IDENTIFY • PROTECT • DECONTAMINATE

Purpose-built for hazmat teams running special-event sweeps and NSSE monitoring, the Sentinel Pack turns a suspicious powder into a decision in minutes - letting down-range crews clear non-hazardous substances or flag a real threat fast enough to keep the Incident Commander ahead of it. Screening, presumptive ID, PPE, and emergency decon are organized in one lightweight, grab-and-go backpack - ready for conventional TICs/TIMs, chemical warfare agents, and emerging pharmaceutical-based agents like fentanyl.

KEY BENEFITS

◆ DECIDE FASTER ON SCENE

Colorimetric screening adjudicates non-hazardous substances or flags a threat in minutes - the answer the IC needs to keep an event moving or lock it down.

◆ PROTECT EVERY RESPONDER

On-scene opioid ID plus FiberTect dry wipes and an emergency sprayer limit fentanyl and PBA exposure before it becomes a casualty.

◆ ONE PACK, EVERY TOOL

Screening, detection, PPE, and decon organized in a single lightweight backpack - built for roving patrols and special-event sweeps.

◆ READY FOR TODAY'S THREATS

Covers conventional TICs/TIMs, chemical warfare agents, and emerging pharmaceutical-based agents in one deployable platform.

WHAT'S IN THE KIT
