

DECONTECT ODK OPIOID DETECTION KIT

KIT CONTENTS

Instruction Card

5 ml Vials
Sterile Water (2)

Test Tubes (2)

BTNX Fentanyl Test Strips (2)

Part Number: BTNX-ODK-02
Available in any quantity

DETECTING THE THREAT: IS IT THERE OR NOT?

The presence of synthetic opioids like fentanyl in our communities poses a serious risk to public safety and health. Detecting and remediating opioid contamination is key to protecting our first responders, law enforcement, and the general public.

MISSION SPECIFIC

The Opioid Detection Kit (ODK) is designed to quickly and accurately detect threats such as fentanyl, ensuring community safety through effective remediation

HIGHLIGHTS

- + Rapid Detection:** The ODK provides quick results, allowing responders to identify the presence of opioids within minutes, even trace amounts, which is important in time-sensitive situations. It's the most sensitive and only low-cost trace detection kit available.
- + Various Uses:** The ODK can be used in various environments, including crime scenes, medical emergencies, routine inspections, and remediation efforts, providing flexibility for different operational needs.
- + Enhanced Safety:** By quickly detecting opioids, the ODK protects responders and the public from accidental exposure, ensuring a safer environment and boosting community safety.
- + Comprehensive Kit:** The ODK has everything needed for opioid detection, like test strips, swabs, and instructions, all in one package. It's also easy to use with a clear instruction card, requiring minimal training.
