

DECON:TECT

RDK

RESPONDER DECON KIT

MISSION SPECIFIC

The RDK (Responder Decon Kit) is a highly effective solution for mass casualty incidents, providing a quick and efficient way for both first responders and affected individuals to conduct immediate decontamination. The kit includes three FiberTect wipes, each with color-coded labels and a specific purpose.

The decontamination procedure is broken down into three easy steps, with an instruction card provided for detailed guidance.

HIGHLIGHTS

+ Easy to carry and transport.
+ User-friendly with clear instructions.
+ Allows for immediate decontamination.
+ Suitable for small to large-scale incidents.
+ Speeds up the transition to further medical care.
+ Enables victims to self-decontaminate, saving critical time.
+ Reduces the burden on first responders by allowing individuals to start the decon process themselves.
